

Submitted	County	Do you have any reef-related problems or concerns you would like to share?	Do you have any suggestions about how to improve the Our Florida Reefs process?	What's the best way to engage, inform, and work with your community?	Do you have any additional comments or suggestions about the Our Florida Reefs process?
8/30/2014	West palm beach FL				
8/28/2014	Palm Beach	<p>I noticed several recently bleached coral colonies, primarily globular Diploria colonies but also Porities a. and Millipora on the north end of Cheeca Rocks off Islamorada on August 24, 2014. The colonies were quite white with no obvious algal overgrowth suggesting the bleaching event was recent. I was happy to not see record of bleaching events in the Keys for the last several years and was sadly surprised to see this.</p>	<p>Managing climate change, good luck with that. Continue to cut down on all the traditional impactors, dredge and fill, surface water runoff and diver perturbations.</p>		

8/22/2014	Broward	<p>It matters not one bit what we do as private citizens to protect our reefs, until cities and counties stop dumping TRILLIONS of gallons of 1/2 treated sewage into our oceans are we ever going to get a handle on the death of our reefs!!!!!!!!!!!!!!!!!!!!!!</p> <p>We must step up and begin the process of stopping the POLLUTION of our reefs with ALMOST UNTREATED SEWAGE, will we ever recover from the damage done OVER THE LAST 50 PLUS YEARS.</p> <p>Do you know the number of gallons yearly dumped into our oceans? Do you for a minute think this is not the main reason our reefs are now DEAD??????????????</p> <p>Until we say no more and start treating our sewage to the point where this discharge causes no more harm will our reefs begin to recover.</p> <p>A concerned citizen, Francis Minor</p>	Read above.	<p>Read above.</p> <p>We the people must start today to say no more pollution from our own Government.</p>	
8/9/2014	BROWARD	<p>PUTTING REEF BALLS ON THE BEST REEFS ONLY BRINGS MORE PEOPLE TO REEFS MOST PEOPLE DONT TAKE THE TIME TO FIND PRISTINE REEF AREA AND BAM THE BALLS PUT THEM RIGHT ON THEM MORE TRAFFIC MORE DAMAGE</p>	<p>HAND PLACMENT OF ANCHORS AND NO REEF BALLS</p>	<p>MORE INFORCEMENT FWC</p>
