On Sunday, March 23, 2014, I led a group of snorkelers off the beach at Lauderdale by the Sea at Datura Ave. We stopped by the Biorock Project. About 100 feet north of the project was a small boat anchored directly on the reef. I politely informed the woman aboard that is was a significant fine if they are caught. About 10 minutes later an FWC boat came by traveling South and was only about 300 feet away, yet he did not stop. People that are aware of the project knows it is on the reef; hence, seeing a boat anchored directly north of

Palm 3/24/2014 Beach

## Background:

I recently moved to the area and understand teams have just been formed but still hope to get actively involved.

My interest started last spring while diving on a shallow, area wreck. There was significant damage to the surrounding reef likely caused in large part by divers. I swam a short distance north, off the reef and was treated to a vigorous reef.

## Suggestion:

It occurred to me that sections of reef could be placed off limits for a period of time, on a rotational basis, to allow for regrowth. An analogy would be the farmer who allows fields to lay fallow on a rotational basis so that they are more productive. Establishing alternating segments of reef of X length (fallow/open) would ensure that shore based

Connect with scuba operators throughout the state and make them aware of your program.

Is there a state-wide Coral Reef Initiative?

wrote for REEF. While the targeted audiance is other divers the important take-away is the biodiversity that abounds in a long-standing SPA, I would hope this information can shed light on just how important these SPAs are. We only see about 60% of the species on nearby reefs outside the protected area.

The 100 Species Challenge on Alligator Reef, Sanctuary Preservation Area (SPA) Islamorada, Florida

Its easy to take for granted places that you see regularly and miss out on how special they are, Alligator Reef in the Florida Keys is such a place for me.

I just put down the latest edition

of one of the dive magazines touting some of the most amazing dive sites in the world; my mind wanders as I daydream Anchoring on the reef and garbage on the reef (old traps, fishing line, anchors and anchor
