

S-116

Title: Maintain the ecological function of the wrack line by reducing beach raking practices.

Objective: The intended outcome of this action is to maintain the ecological function of the wrack line by reducing beach raking practices. By improving the ecological function of the wrack line this will improve the resilience, improve fisheries habitats, and improve soil and sediment control.

Background: This recommended management action is being put forth due to current beach management practices that may not be maintaining the slope of the beach and dune system as effectively as possible.
